

Technical Data Sheet

DOWSIL™ 888 Silicone Joint Sealant

Non-sag silicone joint sealant for Portland cement concrete pavement joints.

Features & Benefits

- Can be extruded from -20 to 120°F.
- May be used in joints that are not uniform in width.
- Movement capability 100% extension and 50% compression.
- Low modulus.
- Weather and UV resistant.
- Fuel resistant-short term exposure. Refer to Dow form number 62-207 for more information.
- One-part, cold applied, ready-to-use as supplied; dispensed directly from the bulk container into the joint by hand or with an air-powered pump.
- Unprimed adhesion primer is not required for bonding to Portland cement concrete. For optimum adhesion, the surface must be clean, dry and frost-free.
- Cure time typically, the sealant will have a skin-over time of one hour or less at standard conditions.

Composition

One-part, cold applied, non-sag silicone sealant.

Applications

- DOWSIL™ 888 Silicone Joint Sealant can be used for concrete to concrete pavement joints.
- For use in new construction, repair or remedial applications. DOWSIL™ 888 Silicone
 Joint Sealant may be used to seal joints that are not uniform in width provided the
 movement capability of the sealant is not exceeded. May also be used in joints with
 minor spalling.

Typical Properties

Specification Writers: These values are not intended for use in preparing specifications.

Test ¹	Property	Result	D 5893 Requirement
	As Supplied		
	Color	Gray	
ASTM D 2202	Slump	Pass	< 0.30 inches
ASTM C 1183	Extrusion Rate, Minimum	72 mL/min	20 mL/min
ASTM C 679	Tack Free Time	Pass	5 hours max

1. ASTM: American Society for Testing and Materials.

Typical Properties (Cont.)

Test	Property	Result	D 5893 Requirement	
ASTM C 792	Heat Aging	3.05%	10% loss max	
ASTM C 661	Durometer Shore A-2	15	25 maximum	
ASTM C 792	Specific Gravity	1.48		
	Cure Time, ½" x ½"x 2" (73°F, 50% R.H.)	Pass	21 day cure	
	As Cured – 21 days at 25°C (77°F) and 50% RH			
	Bond, Non-Immersed	Pass	No cracks or separation	
	Bond, Water Immersed	Pass	No cracks or separation	
	Bond, Oven Aged	Pass	No cracks or separation	
ASTM D 412 (Die C)	Ultimate Elongation	≥ 1000%	600% min	
ASTM D 412 (Die C)	Tensile Stress @ 150%	28 psi	45 psi max	
ASTM C 793	Effects of Accelerate Weathering	Pass	5,000 hours	
	Resilience	77%	75% min	
ASTM C719	Joint Movement Capability, +100/-50 percent, 10 cycles	No failure		

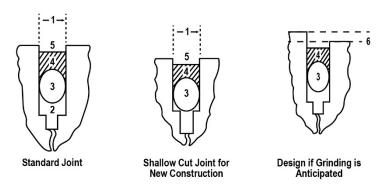

Figure 1: Good joint design

¹Joint width wide enough to accommodate movement. (For additional information on joint width, see papers by Spells and Klosowski, "Silicone Sealants for Use in Concrete Construction," Vol. 1, No. 1, American Concrete Institute, SP-70, 1981; J.B. Cook, "Construction Sealants and Adhesives," Wiley-Interscience, 1970; and J.M. Klosowski, "Sealants in Construction," Marcel Dekker, 1989.).

Description

DOWSIL™ 888 Silicone Joint Sealant is a one-part, non-sag silicone material that cures to a low-modulus silicone rubber upon exposure to atmospheric moisture. Can be applied over a wide temperature range.

²Joint sawed deep enough to allow backer rod/sealant placement and space for pumping of old sealant compounds. NOTE:

This applies to standard joints only; void space beneath backer rod in new construction is not needed.

³Proper backer rod placement to prevent three-sided adhesion.

⁴Sealant installed to proper depth and width.

⁵Sealant recessed a minimum of 3/8 inch to 1/2 inch (9.53 mm to 12.7 mm) below pavement surface.

Depth of lowest slab determines the amount of recess required if grinding is anticipated; once grinding is complete, the sealant will have proper recess below the pavement surface.

Applicable Standards

- ASTM D 5893 Type NS
- FAA P-605 for silicone joint sealants
- Meets SS-S-200E (section 4.4.12) Flame Test Requirements
- EN 14187-5 Hydrolysis Test

How to Use

Please refer to the Dow Silicone Pavement Sealants Installation Guide.

Handling Precautions

PRODUCT SAFETY INFORMATION REQUIRED FOR SAFE USE IS NOT INCLUDED IN THIS DOCUMENT. BEFORE HANDLING, READ PRODUCT AND SAFETY DATA SHEETS AND CONTAINER LABELS FOR SAFE USE, PHYSICAL AND HEALTH HAZARD INFORMATION. THE SAFETY DATA SHEET IS AVAILABLE ON THE DOW WEBSITE AT DOW.COM, OR FROM YOUR DOW SALES APPLICATION ENGINEER, OR DISTRIBUTOR, OR BY CALLING DOW CUSTOMER SERVICE.

Usable Life and Storage

Keep stored in original, unopened containers at or below 32°C (90°F). Refer to product packaging for "Use By" date. Keep containers tightly closed.

Packaging Information

DOWSIL™ 888 Silicone Joint Sealant is supplied in 29 fl oz (857 mL) disposable plastic cartridges, 4.5 gal (17 L) bulk pails, and 50 gal (189 L) bulk drums.

Limitations

DOWSIL™ 888 Silicone Joint Sealant is not recommended for continuous water immersion. It should not be applied in totally confined spaces where the sealant is not exposed to atmospheric moisture.

Not intended for use with asphalt.

The sealant should never be applied to wet or damp asphalt or concrete pavements or installed during inclement weather.

Dow does not promote or warrant the use of Dow sealants in applications associated with spill containment areas of any kind.

This product is neither tested nor represented as suitable for medical or pharmaceutical uses.

Shipping Limitations

None.

Health and Environmental Information

To support customers in their product safety needs, Dow has an extensive Product Stewardship organization and a team of product safety and regulatory compliance specialists available in each area.

For further information, please see our website, dow.com or consult your local Dow representative.

Disposal Considerations

Dispose in accordance with all local, state (provincial) and federal regulations. Empty containers may contain hazardous residues. This material and its container must be disposed in a safe and legal manner.

It is the user's responsibility to verify that treatment and disposal procedures comply with local, state (provincial) and federal regulations. Contact your Dow Technical Representative for more information.

Product Stewardship

Dow has a fundamental concern for all who make, distribute, and use its products, and for the environment in which we live. This concern is the basis for our product stewardship philosophy by which we assess the safety, health, and environmental information on our products and then take appropriate steps to protect employee and public health and our environment. The success of our product stewardship program rests with each and every individual involved with Dow products - from the initial concept and research, to manufacture, use, sale, disposal, and recycle of each product.

Customer Notice

Dow strongly encourages its customers to review both their manufacturing processes and their applications of Dow products from the standpoint of human health and environmental quality to ensure that Dow products are not used in ways for which they are not intended or tested. Dow personnel are available to answer your questions and to provide reasonable technical support. Dow product literature, including safety data sheets, should be consulted prior to use of Dow products. Current safety data sheets are available from Dow.

Table 1: Recommended Backer Rod Installation (Shallow Cut)¹

Measured in Inches						
Joint Width	1/4	3/8	1/2	3/4	1	>1
Recessed Below Surface	3/8	3/8	3/8–1/2	3/8–1/2	1/2+	Contact Dow
Sealant Thickness	1/4	1/4	1/4	3/8	1/2	
Backer Rod Diameter	3/8	1/2	5/8	7/8	1 1/4	
Total Joint Depth	1–1 1/8	1 1/8–1 1/4	1 1/4–1 3/8	1 5/8–1 3/4	2 1/4–2 3/8	
Measured in Millimeters						
Joint Width	6	9	13	19	25	
Recessed Below Surface	9	9	9–13	9–13	13+	
Sealant Thickness	6	6	6	9	13	
Backer Rod Diameter	9	13	16	22	32	
Total Joint Depth	25–29	29–32	32–35	41–45	57–60	

^{1.} On road surfaces where grinding is planned at a later date, the sealant and backer rod should be installed so that sealant is approximately 3/8 inch (9.35 mm) below the road surface after grinding is complete. An additional small amount should be added to allow for surface imperfections on the bottom and to provide room for old sealant to pump up from below during rehabilitation work in the summer months.
